PROFILE

I am a passionate computer scientist with a strong foundation in software development and problem-solving. I am a dedicated lifelong learner with lots of curiosity! In my free time you can find me learning languages such as Spanish or practicing solving Rubiks cubes. I am very interested in music and cooking too!

EDUCATION

Colorado School of Mines - Golden, CO Bachelor of Science, Computer Science

July 2021 - May 2025 CSCI GPA: 3.04

Mines EE Classes: Circuits, Digital Logic, PCB Design, and Elements of Computing.

January 2017 - January 2021 Napa Valley College - Napa, CA

Certifications: Autodesk Fusion360

TECHNICAL SKILLS

Python3, C/C++, Rust, Go, JavaScript, Postgres SQL, Verilog Languages Dev. Tools | Linux, Docker, Git, Makefile, Nix, Nginx, S3 Bucket Express.js, Flask, NumPy, Pandas, Matplotlib, SciKitLearn Libraries Software Tools PlatformIO, Fusion360, EagleCAD, FreeCAD, KiCAD, Quartus Hardware Tools | Oscilloscope, Arduino, THT & SMD Soldering Protocols | I2C, SPI

WORK EXPERIENCE

Contractor Work: Tech Lead & Manager - SwingLens LLC

May 2025 - June 2025

- Managed a team of 7 intern engineers whilst working closely with other advisors.
- · Advised on Python, Flask, Hardware configuration, and industry programming practices.
- Developed and open-sourced a Python tool for importing Jupyter Notebooks.

Research Internship - CSM & National Science Foundation

May 2024 - September 2024

- · Automated data aggregation, filtering, and processing with Python and Pandas.
- Trained SciKitLearn models to identify vulnerable network data.

Product Development Internship - Analytical Data Systems

May 2023 - August 2023

- · Developed a toolchain to have LLMs to introspect and reprompt for more normalized results based on user-defined qualities.
- Implemented several interfaces to interact with the service from Discord or a custom web client in JavaScript.

Last Updated: December 31, 1979

</> PROJECTS

Muserve App - Author

July 2025 - Present

Self hosted music streaming service with future plans of developing compatible hardware.

- Hand rolled, multiprocess safe, authentication using python, JWTs, and sockets.
- Safe data ingest with **mimetype detection**, conversion to **Vorbis ogg**, and storage in **postgres**.
- Web UI written in modular JavaScript, using Flask templates on static routes.
- Seperation of internal and external network via Nginx Proxying

NovaMill Open Hardware PCB Mill - Author

July 2025 - Present

NovaMill is a work in progress Open Hardware desktop PCB Mill with the goal of making rapid PCB prototyping easier as faster.

- Real-time motor and sensor control with Pi Pico 2 W running Marlin.
- Pi Zero 2 W running custom Linux distribution for on-device machine learning corrections.

BreadLeaf-8 (BL-8) Hardware Implementation - Author

June 2025 - Present

Working towards implementing my custom **8-bit** Computer based on **74HC** chips. The architecture is based on my **Distributed Custom ISA Execution Environment** software project.

- Designed and iterating on custom toolchain to edit my CPU's microcode.
- Implementing FPGA adaptaion to be implemented in the Tiny Tapeout ASIC project.

Distributed Custom ISA Execution Environment (BL-8 Computer Architecture) - Author April 2025 - Present

Designed a custom computing ecosystem, including an **Instruction Set Architecture** (ISA), **Assembler**, **Virtual Machine** (VM), and a **TCP** machine state transmission networking protocol. The system enables distributed execution of custom machine code across a client-router-server architecture.

- The custom 8-bit ISA is executed by a corresponding VM developed in Go, featuring 256bytes of RAM.
- The custom **TCP** networking protocol implemented in **Go**, enables distributed execution by transmitting machine state packets between client, router, and server.
- The assembler translates human-readable assembly into the custom ISA's machine code using a **LL(1) Tabular Parser** dynamically generated applying **Formal Language Theory**.

BreadPod (Muserve Hardware Companion) - Author

September 2024 - Present

- ESP32 based music player with touch control.
- Communicates with Muserve Server software project.

Robotics Software Engineer - FRC #7667

November 2018 - June 2019

- Competed in the 2019 Houston World Championship.
- Fabricated and implemented a game piece manipulation mechanism using C++ and WPILIB.
